DATA SERIES 17.0 - BUSINESS INTELLIGENCE

BY KEISHA AZZAHRA ZALYAPUTRI

BACKGROUND PROBLEM

Superstore operates across multiple regions in the United States, offering a diverse range of products, including furniture, technology, and office supplies. Despite its broad market presence, the company faces critical challenges in optimizing sales and profitability.

Key challenges include:

- 📌 Regional Sales Disparities: Some regions consistently underperform compared to others.
- 📌 Profitability Concerns: High sales do not always translate to high profit margins.
- 📌 Sales Trend Variability: Demand fluctuates based on seasonal trends and customer behavior.

By leveraging data-driven analysis, this study aims to uncover actionable insights that support strategic decision-making and enhance overall business performance.

Data Source: This analysis is based on publicly available data from Kaggle.com

ABOUT DATA SET

Sales & Financial Data

- Sales: Total sales per transaction.
- Profit: Profit generated from each sale.
- Discounts: Promotional discounts applied to products.
- Quantity: Number of product units sold.

Product Data

- Product Name: The name of the product sold.
- Category: The main product category (Furniture, Office Supplies, Technology).
- Sub-Category: Further classification (e.g., Chairs, Phones, Binders).

Customer Data

- Customer Name: Name of the customer making the purchase.
- Customer Segment: Classification of customers (Consumer, Corporate, Home Office).

Geographic Data (Location)

- City: The city where the transaction occurred.
- State: The state or province of the transaction.
- Region: Geographic classification (West, East, Central, South).

Delivery & Order Data

- Order Date: Date when the order was placed.
- Delivery Date: Expected delivery date.
- Ship Mode: Shipping type (First Class, Second Class, Standard Class, etc.).

METHODS

Data Preparation : Join raw data for accuracy.

Visualization & Interpretation : Designing intuitive charts, graphs, and predictive models to extract meaningful insights.

TOOLS

OVERALL DASHBOARD

INTERPRETATION

WHAT DATA SHOW

- **Sales Performance:** Sales figures vary across different regions and product categories, with certain products contributing significantly to revenue.
- **Profitability:** Some products generate high revenue but lower profit margins, possibly due to high discounts or operational costs.
- **Regional Analysis:** Certain regions outperform others in both sales and profit, indicating differences in market demand.
- **Customer Segmentation:** The distribution of customers among Consumer, Corporate, and Home Office segments shows varying purchase behaviors.
- **Shipping & Delivery Trends:** Faster shipping modes (First Class, Same Day) may be linked to higher-value transactions, while Standard Class is used for bulk orders.

INSIGHT FROM KEY FINDING

High Discount Products May Reduce Profitability: Categories with frequent discounts (e.g., Office Supplies) might attract sales but erode profit margins.

Technology and Furniture Drive Revenue: These categories contribute the highest sales but need profitability optimization.

Corporate Customers Make Higher-Value Purchases: The Corporate segment tends to purchase in bulk, making them a key customer base for sustained growth.

Delivery Time Impacts Customer Satisfaction: Delays in delivery could affect repeat purchases and customer retention rates.

Regional Variances in Performance: Some regions generate high sales but lower profit due to increased operational costs or competition.

RECOMMENDATIONS

STRATEGIC ACTIONS FOR BUSINESS IMPROVEMENT

- Optimize Discount Strategy: Reduce discounts on low-margin products and implement targeted promotions for high-profit categories.
- Improve Supply Chain & Logistics: Identify inefficiencies in shipping and explore partnerships to reduce costs while maintaining fast delivery.
- Target High-Value Customer Segments: Focus on personalized marketing strategies for Corporate and Home Office segments to increase bulk purchases.

- Regional Expansion Strategy: Invest in high-performing regions while conducting further market research to improve weaker regions.
- Product Portfolio Optimization: Discontinue or reprice underperforming products and allocate more resources to high-demand, high-margin items.
